June 22, 1987

Honorable Tom Bradley  
Mayor, City of Los Angeles  
City Hall, Room 205  
Los Angeles, CA 90012

Dear Mayor Bradley:

The Board appreciates your interest in the ground water pollution problems underlying the Lockheed-California Company facilities in Burbank as expressed in your letter of May 15, 1987, to Lockheed President R. R. Heppe. As you may know, the Los Angeles Regional Water Quality Control Board, since 1984 has been working with Lockheed and a number of other companies to investigate and cleanup soil and ground water pollution in the San Fernando Valley.

As the lead oversight agency, the Board has worked closely with representatives from your city to ensure that all aspects of these investigations are completed as expeditiously as possible and the beneficial use of this precious ground water resource is fully restored.

We look to your leadership to ensure that the close working relationship the Board has worked hard to achieve with your City will continue on this project and that our mutual goal of clean water can be met in a cooperative spirit of working together.

Sincerely,

RONALD D. WHERRY  
Chairman
